***I-89 Lamoille River Bridges – Steel Erection and Potential Traffic Impacts***

August 15, 2014 – Press Release

Milton, VT – Tetra Tech Construction will begin the mobilization of cranes and girders for Phase One Steel Erection on Monday, August 18, 2014 and will be performing Steel Erection operations from August 25<sup>th</sup> to September 12<sup>th</sup>. To facilitate this work, a rolling roadblock will be performed throughout the work zone. A rolling roadblock is a traffic control technique to significantly slow down but not completely stop traffic in order to facilitate such work operations for short durations.

The Project Team asks the travelling public to help keep workers safe by reducing speeds through the active work zone and to stay alert for changing conditions. Additional speed enforcement will be present in the construction zone, and drivers are to be reminded that it is now against the law to use a hand held cell phone in construction work zones.

Information about the project and traffic impacts can be found on the project website:
