***I-89 Lamoille River Bridges – Steel Erection and Potential Traffic Impacts***

May 13, 2016 – Press Release

Milton, VT – Tetra Tech Construction has started mobilization of cranes and girders for Phase Three Steel Erection and will be performing Steel Erection operations from May 16<sup>th</sup> to June 4<sup>th</sup>. To facilitate this work, a rolling roadblock may be performed throughout the work zone during this time. A rolling roadblock is a traffic control technique to significantly slow down traffic to a minimum of 20 mph in order to facilitate such work operations for short durations.

The Project Team asks the travelling public to help keep workers safe by reducing speeds through the active work zone and to stay alert for changing conditions. Additional speed enforcement will be present in the construction zone, and drivers are to be reminded that it is now against the law to use a hand held cell phone in construction work zones.

Information about the project and traffic impacts can be found on the project website:
